To Whom It May Concern,

We are pleased to provide this reference for the **Smart Optimizer ECOD device**, which we recently evaluated at one of our Burger King locations.

From **June 13 to July 10, 2024**, we conducted a thorough assessment of the ECOD device to determine its impact on energy consumption and operational efficiency. After this testing period, we are pleased to confirm the following outcomes:

1. **Significant Energy Savings:** The implementation of the Smart Optimizer ECOD device resulted in an **8.41% reduction in energy consumption (kWh)**. This impressive reduction exceeded our initial benchmarks, demonstrating the device's effectiveness in optimizing energy use.
2. **Seamless Integration:** Throughout the trial period, the ECOD device operated smoothly, without any interruptions to our daily operations. This allowed us to maintain our service standards without any disruptions.
3. **Enhanced Operational Efficiency:** In addition to reducing energy consumption, the ECOD device consistently ensured system stability and supported ongoing operational efficiency.

Based on these results, we are satisfied with the performance of the Smart Optimizer ECOD device and would recommend it as a reliable solution for energy optimization. It has proven to be a valuable asset in achieving our sustainability goals while maintaining our operational standards.

Should you require any further information or details regarding our experience, please do not hesitate to reach out.

Sincerely,

Saner Cibo

Maintenance Manager
